Thanks Cliff. Here's my general thought about structure, with only having skimmed this. Can you send me our comments on alternatives? Would like to see what we have already said.

Ex. 5 - Deliberative Process

Ex. 5 - Deliberative Process

On quick read was not following the point of the last part of the intro so not sure where that is going.

Attached are our suggestions; note that the introductory comments are not in redline/strikeout, but it is all new language that needs your review.

Can you send us your new language for the Air Quality section?

Let us know what you think.

If we can get a draft to the Principals by COB today that would be good!

Thanks,

- Cliff
